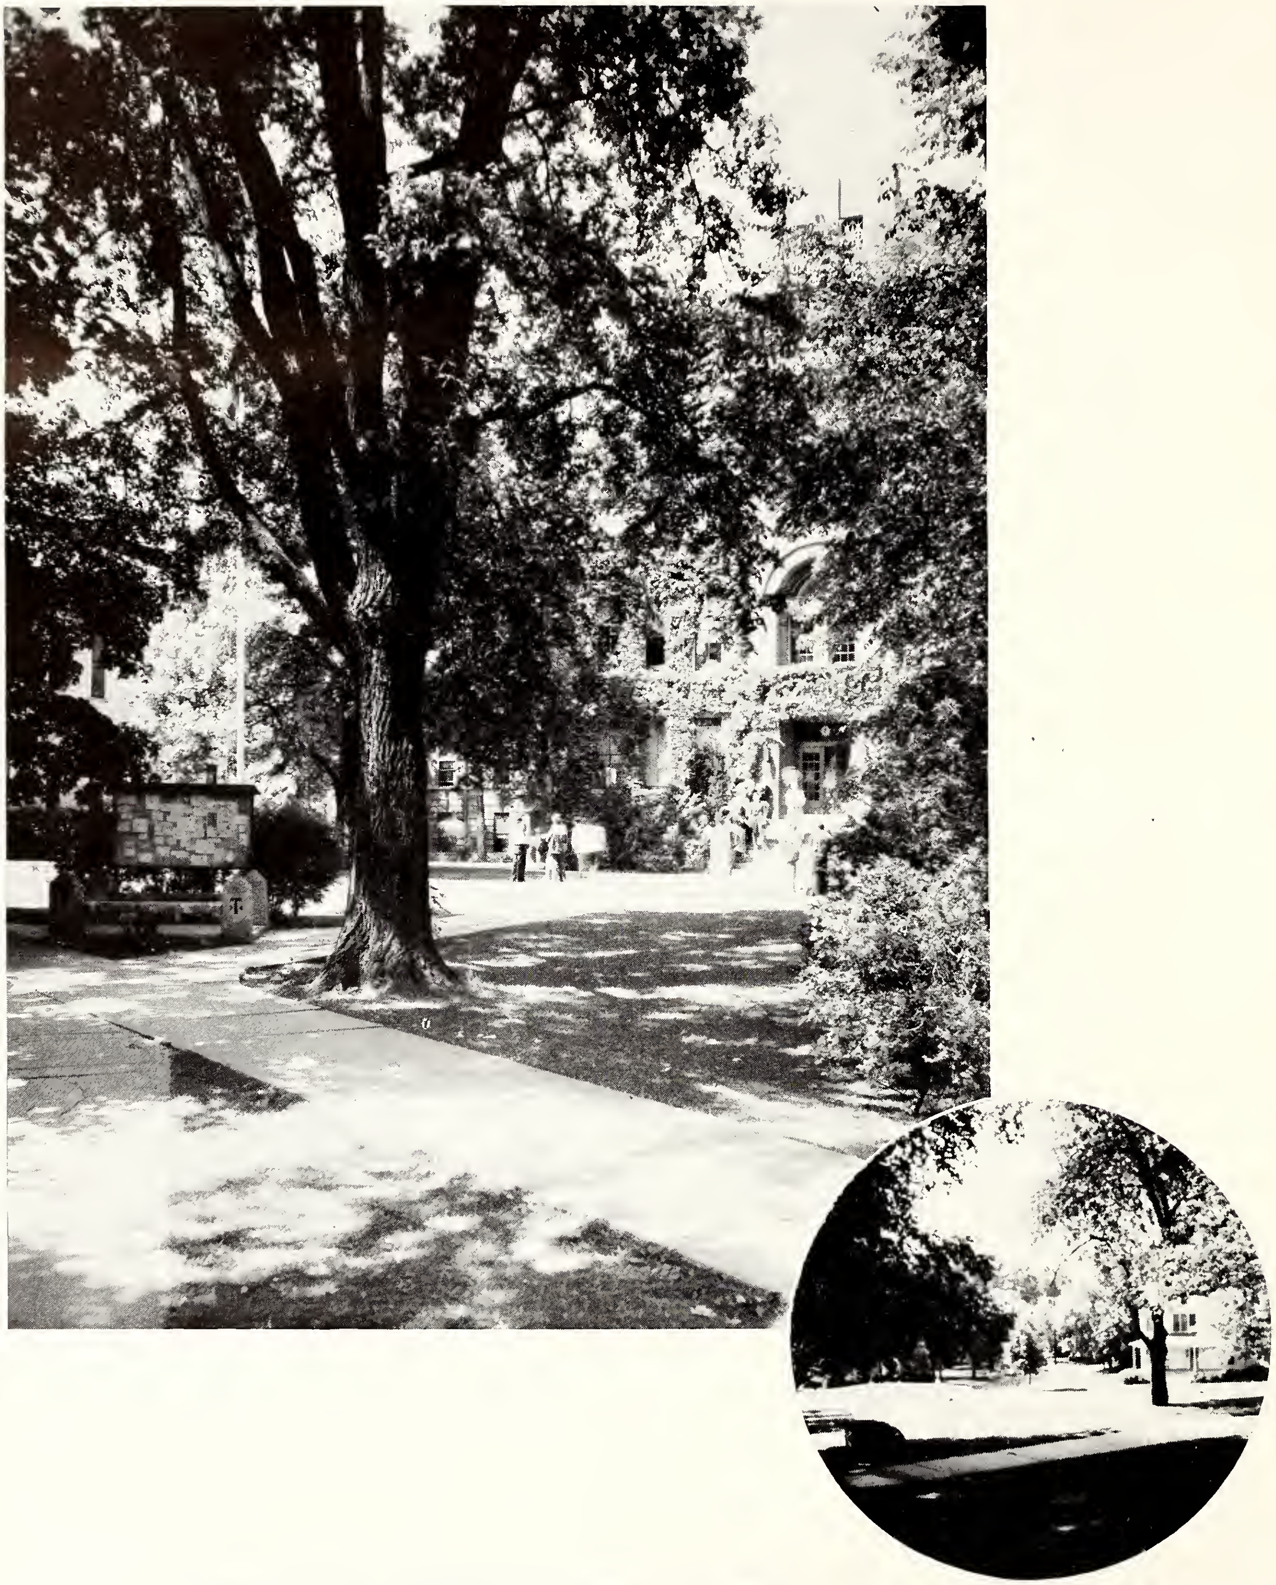
Dedication

To those men of Tri-State College who so willingly and bravely sacrificed their lives beneath our flag in the service of our country while fighting the battles of World War II, so that we may continue to enjoy the ideals of freedom and democracy.

Allen County Public Library
900 Webster Street
PO Box 2270
Fort Wayne, IN 46801-2270



Administration building as spring gets into swing. Although always beautiful it is glorious now.

Every path, every nook, where we loved to wander and linger will remain dear in the memory of every student.

Administration

The administrative department of Tri-State College is undoubtedly due the honorable esteem of all its students; primarily, because they constantly endeavor to portray the earnest and wise judgment which we all require for the battle of life.

BURTON HANDY
President Tri-State College

Modulus 1942

The 1942 publication of the Modulus finds a world immersed in strife and bloodshed. Vast armies are locked in mortal combat; fleets of airplanes wheel and dive to gain advantage of position, and drop deadly bombs; the lurking submarine skulks under the surface of the sea, seeking whom it may devour. War is running rampant over the surface of the earth, and prophets foretell the destruction of all men and the submergence of civilization. The outlook is dark indeed, but there is some encouragement in the contemplation of how often men have been mistaken in the past under similar circumstances. This is not the first time that the scourge of war has swept the earth. Many times before men have foretold the destruction of civilization and the loss of all gains which mankind has made through the centuries. Always, however, the resiliency of man's spirit, the fertility of his imagination, and the strength of his courage have united to make it possible for him to overcome the obstacles in his path, to surmount the difficulties in front of him, and to go on to greater heights than he had attained before. Let us hope that history repeats itself in the crisis now upon us!

The Graduate's Future

Not only the graduate but every individual is interested in how he is going to come out in the future. Every one of us wishes to be successful in all of our undertakings but statistics prove that but a small percentage of individuals have been successful in the past. First af all one should have a good education so that he can analyze the every day problems ahead of him and then make an honest endeavor to make the proper application. One should study conditions and the trend of things around himself and carefully note what other individuals are doing to better themselves. It should go without saying that we should be able to notice how the leaders around us proceed and to be able to detect the difference between showmanship and the principles of real action used by the real leaders. With some initiative and careful application of fundamentals there is practically nothing that can stand in the way of the modern graduate attaining real success in the future.

WILLIAM A. PFEIFER,
Dean of Engineering.

Character Is the Measure of Progress

The value of character is the standard of human progress. The individual, the community, the nation, tells its standing, its advancement, its worth, its true wealth and glory by its estimate of character. Wherever character is made a secondary object sensuality and crime prevail.

He who enters upon any study, pursuit, amusement, pleasure, habit, or course of life without first considering its effect upon his character is not a trustworthy or honest man.

Just in proportion as a man prizes his character so is he. This is the true standard which finally gauges all his acts. The great hope and pillar of society is the individual character.

GEORGE G. NIEHOUS,
Chairman of the Board of Directors.

Opportunity Awaits Those Qualified

As soon as college days are over, the graduate must begin to look for a suitable position. It will be very easy to become discouraged, especially after being told a number of times that his services are not required. It is well to know that in every organization there is some person who serves as employment manager whose duty it is to interview prospective employees. Many times this man must talk with hundreds of applicants before a person can be found who possesses the necessary qualifications. Industrial organizations are just as interested in finding capable employees as the individual is in locating a remunerative position. And after a young person is located he must ever be on the alert for something better. During the past few years facilities for manufacturing have been improved and methods of distribution have been changed, all for the purpose of lowering costs to the ultimate consumer. New industries are being started and basic changes are continually made in the older ones. Opportunities are sure to appear to the individual who interests himself in these newer and better ways of doing things.

RAYMON T. ROUSH,
Secretary-Treasurer.

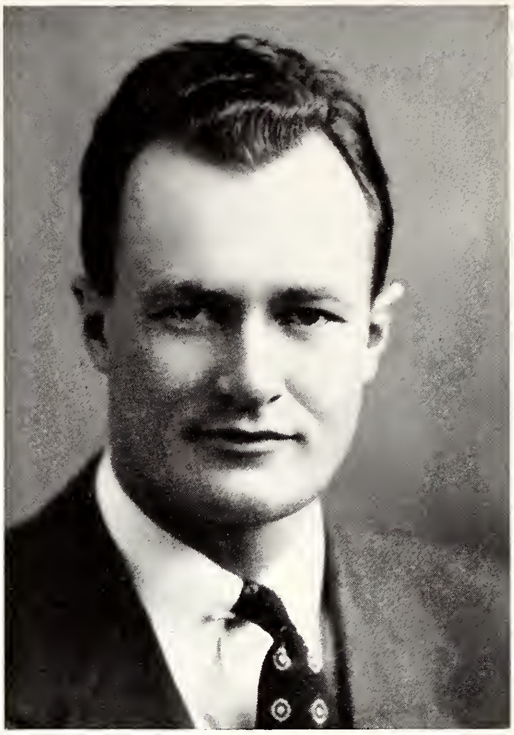
Graduates

To our graduates, upon whose shoulders fall a portion of the future destiny of us all. May they always have the initiative to prepare well the highways of posterity.

RICHARD WHITE
President



Class President's Message

HANDS—We have had our training to go forth into this world and make our way. What does this world hold for us? First we have a big job to do. We have to make it free, to make all these things that we blithely consider America—the table of contents of our volume of freedom that was ours to enjoy. Are you sure that you are going to be able to hand them along to free people? Hand along what? The right of your sons to pick their own vocation, as you have done, your right to speak your own mind, to choose your own church, to trial by jury, to the sanctity of your home against invasion, to the freedom of the press to criticize our Government and public officials, to your right to peacably petition that Government, and to change that Government and its make-up, if need be.

Yes, you have your hands to do these things. Your hands that will perhaps shoulder a gun to rid the world of one or more Germans. Those hands that might control a plane to sink a Jap ship and all those hands that will sweat in factories or workships to turn out vital munitions of war. Short, broad hands and long, thin ones will work side by side to make our America free so that you may make your way in the field you have chosen here at Tri-State.

On behalf of the graduating class of 1942, I would like to take this opportunity to express our appreciation to the professors for their part in training us in the various fields, which we have individually chosen.

The senior class officers are most grateful for the splendid cooperation shown by the committees and our faculty advisor, Professor Summers, in the past six weeks of preparation of our graduation exercises.

My sincere best wishes for a successful future to all my fellow graduates!

—RICHARD WHITE,
Senior Class President.

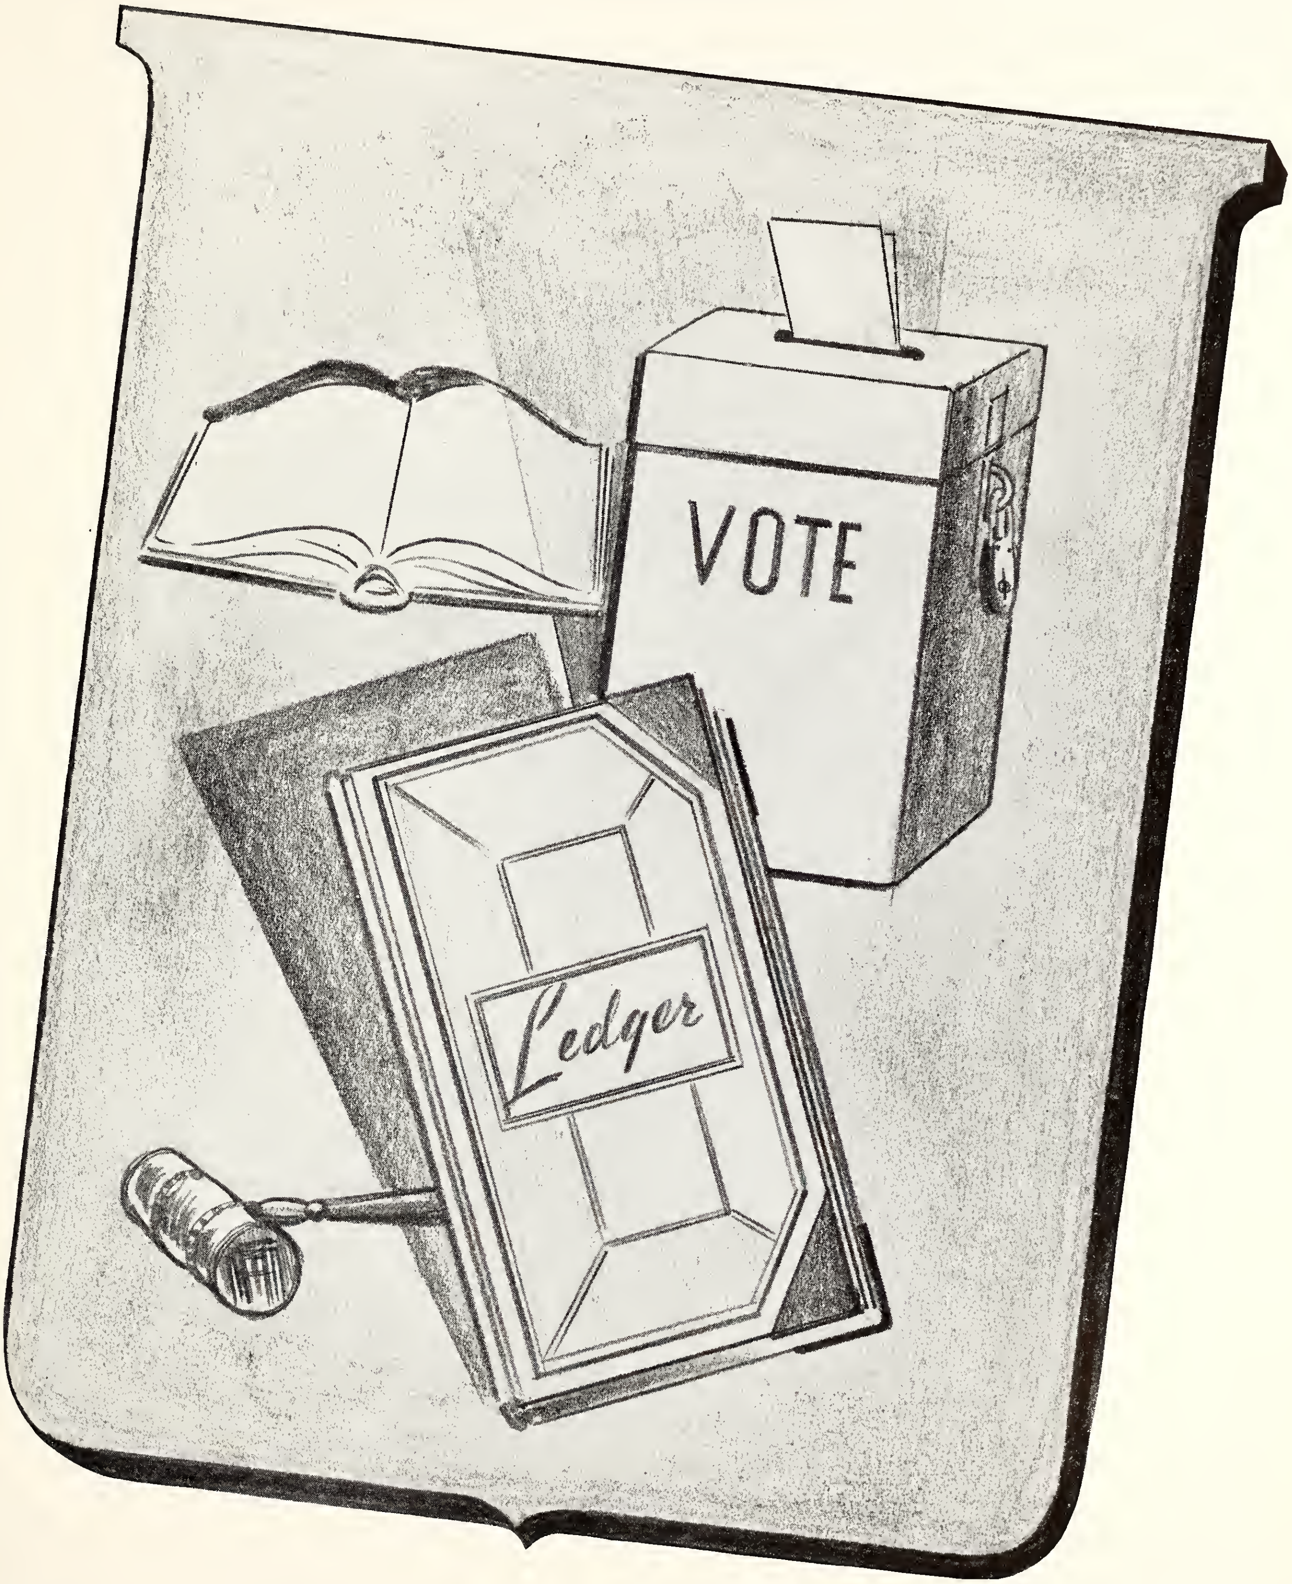
Societies

Societies endeavor to interpret the business world to the student and to encourage the student to become proficient in his field.



VOTE
Ledger

Back row: Ed Hathaway, V. Hartman, Gene Gillum, E. M. Stapleton, Martin Factor, G. Brauss, Max Erwin.
Middle row: J. Erikson, Mason Bliss, William Cutler, J. Savage, Deac Goff, William McPeek.
Bottom row: Miss C. Lewis, V. Wilson, Miss B. Bodell, Al Peters, K. Tolbert, C. Getzlaff, W. Deiterly.

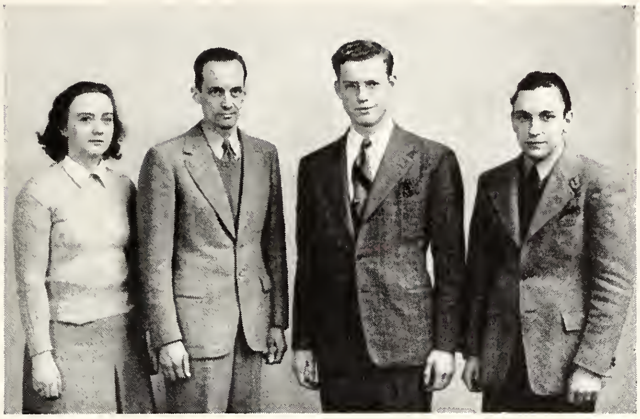
Sigma Epsilon

Sigma Epsilon started again in the fall with a new beginning this year. There were two speakers obtained in the form of Mr. Gallmeyer, sales manager of the Wayne Pump Company, and Mr. Dye, of Wolf and Dessauer, both concerns being located in Fort Wayne. Also there were two socials held during the term.

The winter term followed with Mr. Myers and Mr. Barnes of the Fort Wayne Engraving Company giving methods and control of their concern.

During the spring term the society brought down from Coldwater, Mich., the president of the Homer Furnace Company, who gave a very interesting talk on office management.

The Commercial School then took a field trip to Chicago during May, where they saw the stock exchange, board of trade, and many other places of interest. This concluded the year of activities which was enjoyed by all.



Barbara Bodell, *Secretary*
Al Peters, *Treasurer*
Ken Tolbert, *Vice President*
Charles Getzlaff, *President*

With hopes that the society will continue with as much success in the future as in the past, a few words of praise should be said for the officers and their work which led to this success. They did the job well, so may we wish the best of luck to them.

Back row: D. Christopherson, W. Reedhart, L. Kyser, W. Hilton, W. Scott, M. Hosmer, J. Lee.
Middle row: H. Dunkelberger, R. Stout, J. Brower, R. Farr, A. Adams, R. Thompson, D. Gilbert.
Front row: F. Mitchell, J. Tramuta, D. R. Paffumi, M. Sandler, S. Acton, R. McNall, F. Suozzi.

The Institute of Aeronautical Sciences

The Institute of Aeronautical Sciences is a national organization of Aeronautical Engineers. It has, as members, some of the world's most prominent engineers and pilots. The Institute publishes a journal designed to keep its members abreast of the developments of the industry.

We have had a chapter, or student branch, of the Institute at Tri-State for a number of years. The members of this branch are accepted student members of the national organization, and are entitled to certain privileges, as such. They are enabled to subscribe to the journal, at reduced rates. They may borrow books and articles from the famous Kollsman Library. When they have completed their work in college, they can become technical members of the national organization.

Our chapter has, as its aim, a balanced program of enlightenment including worthwhile speakers from the industry, instructive motion

Martin Sandler, *President*
Stan Ackton, *Vice President*
Don Beatty, *Treasurer and Secretary*

pictures, field trips, periodic banquets, and a certain amount of entertainment.

The Institute merits the cooperation of every Tri-State Aeronautical student.

Back row: R. Wong, Naye, ——, W. Connell, D. Hahn, D. Gulvin, D. Abuch, Howes, A. Roth, J. Arnold, V. Cordova, J. Toomey.
Middle row: I. Alger, R. Salas, D. Bell, G. Gwaltney, D. Chryst, V. Snapp, C. Preble, S. Scheter, S. Levers.
Front row: S. Stan, J. Jewhurst, Prof. Radcliffe, W. Means, Prof. Hauber, R. Firth, R. Butler.

The Civil Engineering Society

This marks the end of the eighth successful year for the Civil Engineering Society. The society was organized in October, 1933, for the purpose of creating good fellowship and to study problems that will enable the future Civil Engineer to adapt himself in the field.

The first meeting of the fall term was spent in getting the members acquainted. Several members gave short talks on their experience in the field.

The banquet of the fall term was held in the banquet room of the Hotel Hendry in Angola. Judge Clyde C. Carlin was the speaker.

During the winter term the society was fortunate in obtaining some pertinent films on the Panama Canal, the oil industry in Europe, and several films on mining in various parts of the world. All of the films

★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★ ★

William Means, *President*
Richard Firth, *Treasurer*
J. Jewhurst, *Secretary*

were on subjects that had direct bearing on the present war situation.

There was an inspection trip to the Fort Wayne sewage disposal plant at the end of the winter term. The banquet was held at the Hotel Keenan on the same day. Mr. Clyde A. Walb, president of the American Steel Dredge Company, gave the address. The intermediate meetings were filled in with movies, talks by various professors, and various industrial speakers.

The society sponsored two raffles and a movie during the year. The first raffle was held "before Pearl Harbor" so the prize was in cash, but in the second one a $25 Defense Bond was given away.

Defense precautions made it hard for the society to get into any place for inspection or field trips, but they felt fortunate in being able to do what they did.

The officers were:

Fall term—Vincent Butler, President; Harold Salas, Secretary; Howard Riggs, Treasurer.

Winter term—William J. Means, President; John Jewhurst, Secretary; Richard Firth, Treasurer.

Spring term—D. M. Chryst, President; Sam Stan, Secretary; Andrew Roth, Treasurer.

Back row: G. Trigo, Kewelwyn, J. Seymour, J. Spinner, ———, W. Rhinesmith, J. Trigo.
Middle row: R. Moliter, E. Thomson, D. Shell, C. Barth, L. Buividas, R. Sailer, ———, D. Grable, J. Andrews.
Front row: H. Hurst, F. Post, Prof. McFarrin, Prof. G. Moore, F. Fryer, J. Dyson, Farland.

The Chemical Engineering Society

One of the many advantages offered to the chemical engineering student is his engineering society. The purpose of the society is to create a greater interest in chemical engineering and to further the students' knowledge in his chosen field by arranging talks and field trips. These talks are given by men in industry who know and present the practical side of chemical engineering. The field trip offers the opportunity of seeing the processes and equipment in actual operation. The society also gives the student the chance to become more and better acquainted with his fellow student, and with his professors.

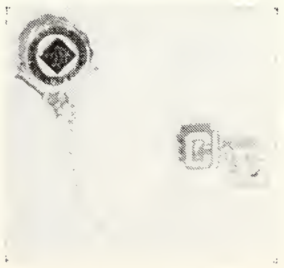
The first meeting of each term is held on the second Wednesday and every other Wednesday thereafter. The Chemical Engineering Society is active three out of the four terms each year, not functioning during the Summer term. Governed by a constitution since 1937, no amendments were deemed necessary until the Fall term of the year 1941 when an amendment concerning attendance and presentation of shingles was made and passed. The climax of each term is a banquet, with some

Fred Post, *Treasurer*
Horace Hurst, *Secretary*
Richard Freyer, *President*

prominent man of industry as guest speaker, held at the Hotel Hendry. The presentation of shingles to those deserving of them is made at this time. The past terms have been successful ones, and may those to come be more so.

Chemical society members, and students are extremely fortunate in having Professors Moore, Slanina, and McFerrin as advisors. We extend to them at this time our warmest thanks and appreciation for their help during the past year.

Congratulations to you members and friends who are graduating, and may you have the best of luck and happiness.



ELECTRICALS

Fourth row: L. Martinez, R. Hurtado, L. Brodsay, J. Maloof, R. Carver, H. England, J. Pesce.

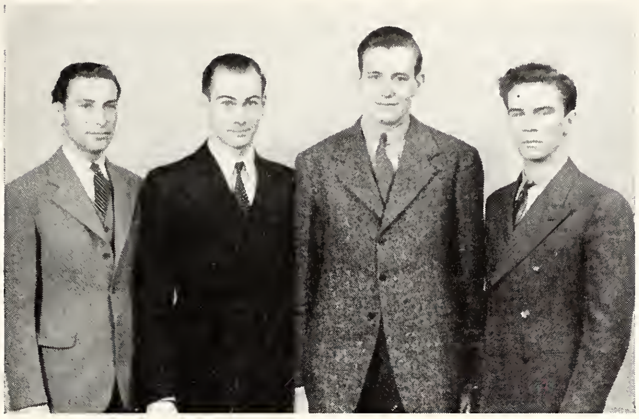
First row: I. French, E. Adams, J. Elegante, S. D. Summers, E. Clarke, E. Reid, R. Olson.

The Electrical Engineering Society

Past achievements have proved to the enrolled students that the finest opportunity to be offered is the privilege of joining the Electrical Engineering Society of Tri-State College. Since the date of its founding, on October 16, 1934, the Society has so progressed, that today it is recognized as one of the leading organizations on the campus. The object of the society is to promote an interest in technical subjects, create friendship among its fellow electrical students, and to provide opportunities for its members to gain experience in conducting meetings and expressing themselves before large groups.

Another function of the society is to go on field trips. These field trips are usually held in the spring. Visits to large industrial and manufacturing plants are always of interest to all its members.

The society meets weekly and the meetings consist of business proceedings, informative lectures and demonstrations. The speakers are men



E. Reid, *Vice President*
R. Olson, *Treasurer*
G. Clarke, *Secretary*
Eugene Adams, *President*

directly from the engineering field, and members of the society itself. During the winter term the society has held a term smoker for the first time in the history of the organization. The sole purpose of this smoker was to make the new members acquainted with each other. The smoker proved to be a great success, due largely to the willingness and close co-operation of the officers and members of the society.

The society has had several invitations to attend the meetings of the Fort Wayne section of the A. I. E. E. and has taken advantage of these invitations and as a result, benefited greatly by them.

The officers and members of the society appreciate the solid support and help of the faculty and would like to take this opportunity to extend their whole-hearted thanks to Professor Summers. The officers wish to extend their thanks to all the members for the cooperation shown throughout the past term, and congratulate the society members who are graduating.

First row: E. Fennig, M. Vliek, L. Jennings, R. Gilbert, A. Zimny, R. Cochrane, R. Liener.

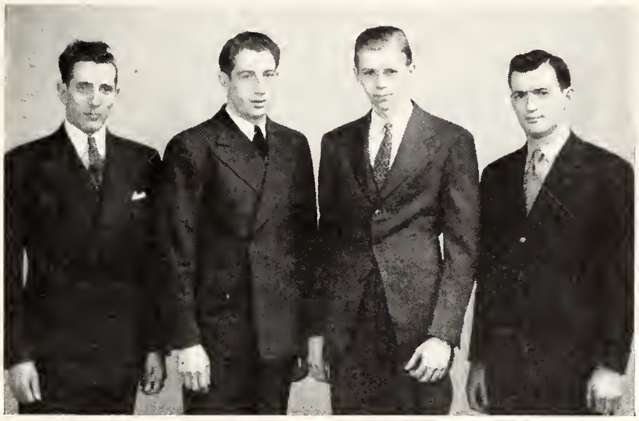
The Mechanical Engineering Society

On the campus of Tri-State College, each Wednesday night, a group of young men meet, uniting for a common interest. This interest is the main power in keeping this organization at its top peak. This interest is a common interest among all members. This interest is to gain a closer contact with industry; with present-day problems and present-day systems; with the place that some day we hope to hold.

Perhaps, to better understand our title, and also our aims, these should be explained.

First, let us take the last word, namely *society*. Webster defines society as a number of persons united for a common interest and purpose; the more cultivated portion of any community in its social relations. What definition could better express the purpose of the Mechanical Engineering Society of Tri-State College?

Next the word *engineering*. Webster defines engineering as the science and art of construction and using machinery; the art and science



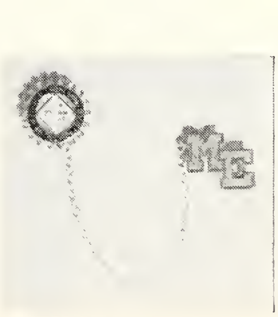
Rod Cochran, *Treasurer*
Maurice Vlick, *Vice President*
Ray Gilbert, *President*
A. Zimny, *Secretary*

of designing and constructing public works; skillful or tactful management; the art and science by which natural forces and materials are utilized in structures and machines. Another part of our purpose, to better understand the fundamentals required for better engineering work. Also, the tactful management of the officers each term have put much into the society.

Last, the word *mechanical*. Webster's definition of mechanical reads: Pertaining to the laws of matter and motion; produced by machinery; pertaining to mechanics; done automatically. This describes more precisely just what type of engineering all the associates of the Mechanical Engineering Society plan to devote their life to.

The Mechanical Engineering Society of Tri-State College is the largest engineering group on the campus, comprising 72 members. It is the only organization that is run on a completely independent basis. All other societies have faculty advisors, but this group has made a success of itself with no advisement. This is being done by a good, well picked organization. We greatly appreciate that we may call the head of the Mechanical Department, Professor John Humphries, "Friend." We also are proud that in the Mechanical Department are men like Professors Clarence Campbell and C. A. Jackson, and we are looking forward to the time when we may have Professor "Bill" Watts to pull jokes on while on field trips. All in all, we feel that we have a fine organization.

—RAY G. GILBERT.



Fourth row: E. Hoover, H. Salisbury, H. Hagen, H. Shidler, R. Thomas, N. Owang, N. Lee, B. Hum.
Third row: T. Butler, L. Wright, J. Tary, B. Cahill, W. Taylor, J. Duggins, W. Meilander, S. Ray.
Second row: R. Leatherman, G. Selvin, D. Miller, L. Brown, F. Samuelson, L. Maslyar, L. Jiminez, H. Keefe.
First row: M. Graham, J. Day, L. Ax, A. Daubendick, J. Malouf, R. Fritz, G. Zimowske.

The Radio Engineering Society

The Radio Engineering Society has served a two-fold purpose on the campus; that of bringing the radio students in closer contact with the fields of radio engineering practice; and that of providing more intimate relationships among the students in the Radio Engineering Department.

The principal function of the society has been that of securing competent men from various radio industries to speak from their own experiences at the weekly society meetings. Many enterprises in nearby communities have been generous in providing timely speakers for these occasions. A number of these men have come equipped with visual aids and apparatus for demonstrations. Banquets and other social activities have been promoted by the society from time to time. A field inspection tour to some industrial center has been regarded as an annual event.

Membership in the society is granted to all interested students, and

S. Garlock, *Vice President*
A. W. Daubendick, *President*
D. Easterday, *Treasurer*
J. Day, *Secretary*

it has been a policy of the society to invite other interested groups on the campus to share the benefits of some of the programs as the occasion may suggest.

The Radio Engineering Society holds amateur radio station license W9PMZ which has been granted by the Federal Communications Commission with Professor Leland S. Ax acting as trustee. This license permits all qualified parties to operate the amateur station equipment in the radio laboratory, and for all unlicensed students to use the equipment under the supervision of qualified parties.

Professor Leland S. Ax and Professor Kenneth Steele have both served as faculty advisers for the society during the past year. Many of the activities of the society have been arranged through the efforts of Professor Ax who has been instrumental in obtaining a number of guest speakers.

Alpha Gamma Omega Fraternity

Since our beginning four years ago, the amazing progress of Alpha Chapter of Alpha Gamma Omega is an inspiration that we members are proud of. The experience gained in building our foundation is incalculable. Besides our catholicity which does so much in making our cause unity, the sense of loyalty, that sense of responsibility, the desire of true

brotherhood had to be of the highest degree to attain such accomplishment. It was hard work, now we look back with pride.

Our main purpose on the campus of Tri-State College is to help each member of Alpha Gamma Omega better his efforts of learning. With this prime motive in mind collaborated with the idea that the experience gained in the task of organization, the development of executive ability, leadership and fellowship is of the greatest value to the school.

It is necessary that we hold true to our ideals of fraternalism and religion more than ever before. Present conditions necessitates this. Like our religion we are bound together by a remarkable unity of belief, practice and purpose; all of which leads us always upward to higher things. We of Alpha Gamma Omega take advantage of this opportunity.

To our departing brothers of this year 1942, we extend sincere wishes for their greatest success. Within four years our men have made commendable progress in industry. Those who are leaving are bound to carry on the good work.

became the Eta chapter of the Alpha Delta Alpha. In 1935 the Alpha Delta Alpha organization was dissolved. Following this dissolution the fraternity became associated with the Alpha Kappa Pi, which has a membership of over thirty-three hundred and a senior membership in the national fraternity council.

The Alpha Kappa Pi has become a national fraternity through the initiative and foresight of its leaders. We are often called upon for our approval for the admittance of new chapters to the fraternity. By virtue of this, the ambitions of recent and future members, our fraternity will continue to prosper and grow larger and assume its place beside the fraternity whose membership may be greater as time moves along.

At the present time the Alpha Kappa Pi consists of twenty-nine active chapters and nine alumni chapters.

Mason-Dixon line, but this was disapproved in the 1927 national convention at which time a charter was granted to a group at the University of Illinois. During the past few years the fraternity has continued to grow in the north, installing chapters in Maryland, Colorado, and Indiana.

At the 1941 national convention, held in Chattanooga, Tenn., Kenneth Neijstrom, Psi Alumnus, was elected to the National Council, thus strengthening the voice of the chapter.

Psi chapter, now in its sixth year at Tri-State, has never lost sight of the ideals of its founders. It has kept the policy for which it stands, admitting those for brotherhood who have shown courage, initiative and good fellowship.

Our beliefs are few enough to enable us to remember them without difficulty, yet be all embracing. We strive, at all times, to see the beauty in all of the Master's creations and so carry out the original ideas of brotherhood as intended in His greatest of fraternities, that the world may come to realize the inestimable value of brotherly love which is synonymous with, and is the very heart of, fraternalism.

We, of the graduating class, cherish the many memories and friendships we have gained in our fraternity.

the first national convention was held in June, 1924, three chapters responded to the roll call. Since that time other strong local fraternities have become affiliated with Beta Phi Theta.

The history of the Delta Chapter of Beta Phi Theta dates back to 1922. At that time, a group of young men organized "The Four Eleven Gang," their purpose being the promotion of good fellowship. The organization became so successful that they decided to expand in order to afford other students the opportunity of enjoying this relationship. It was at this time that Lamba Phi Epsilon was born. The membership of this fraternity grew, and recognizing one of the great needs of the students, opened the first fraternity house at Tri-State in 1925. In 1929, when the college recognized fraternities, the members of Lambda Phi Epsilon realized the advantages of national membership, and became Delta Chapter of the Beta Phi Theta Fraternity.

Delta Chapter, now in its Thirteenth year of existence at Tri-State, has never lost sight of the ideals of its founders. Those chosen for brotherhood are men who have courage, initiative, and fortitude before our eyes. This policy of selection has insured lasting life and leadership for our fraternity.

Phi Iota Alpha Fraternity

Back in 1921 the club Hispano-Americano started its activities as a private social organization composed totally of Spanish-American students attending Tri-State College. After six years of existence, it was registered under the laws of the state of Indiana as Alpha chapter of Gamma Eta Alpha Fraternity.

Not content with our local success, an active and intensive campaign was begun; this movement culminated with the fusion to Phi Lambda Alpha Fraternity as the Eta Chapter. This fraternity whose ideals and views were similar to ours, having fine chapters solidly established throughout the most important universities of the East, represented our goal. Then uniting our efforts with theirs, we carried on our campaign, going from one success to another.

On December 26, 1931, during the annual convention held that year in the city of Troy, N. Y., the Phi Lambda Alpha merged with the Sigma Iota Fraternity, another strong Spanish organization with chapters in the South, forming the present Phi Iota Alpha Fraternity of which we are the Iota Chapter.

At present Phi Iota Alpha is the strongest Spanish organization in the United States, with ten well organized chapters and several new prospects.

Our aims are, besides fostering among our members a better sense of duty and study, to create the Latin atmosphere which is an integral part of uor far-away homes and to prepare our members to carry out in the future that great ideal of ou organization: "The political, social and economic union of all the Latin-American countries."

Phi Sigma Chi Fraternity

DELTA EPSILON CHAPTER

In the fall of 1927, approximately fifteen years ago, the Delta Epsilon Chapter at Tri-State College was organized by twenty-one students and granted a charter by the Phi Sigma Chi Fraternity Incorporated.

The Phi Sigma Chi Fraternity was founded in Zanesville, Ohio, on November 28, 1900, and was originally known as Delta Theta Omega, but with the reorganization and revision of the constitution and ritual in May, 1902, the former was adopted.

It has long been realized that men who have had the distinction of being fraternity members have proved themselves an important part in life surrounding the campus. Employing friendship and brotherhood as their basic principles, an intimate fellowship with their fellowmen is enjoyed to the utmost and nothing surpasses the advantages and benefits, not only derived, but rendered, by a true fraternity man.

The intimate relationships formed during college days constitute one of the most valuable things a man can possess and often ripens into life-long friendships of social and sometimes of material benefit.

College administrators have recognized that the fraternity serves as a useful adjunct to college discipline and organization.

Delta Epsilon wishes the best of luck to all who are graduating or leaving the folds of the campus.

Sigma Mu Sigma Fraternity

Sigma Mu Sigma Fraternity was founded at Tri-State College on Good Friday, March 25, 1921, by three Master Masons. With the enthusiastic aid of nine other Masons, this, the Alpha Chapter, was formed. In 1924, this and other chapters of Sigma Mu Sigma were chartered as a National Fraternity. For twelve years Sigma Mu Sigma held an enviable position on the campus. However in 1936, due to circumstances

beyond its control, Alpha, along with several other chapters was forced to become inactive. In 1940 Alpha Chapter was reorganized through the efforts of loyal alumni members, and in the same year joined the Inter-Fraternity Council. Since that time the Fraternity has enjoyed a successful career, and has once more the enviable position it formerly held.

Sigma Mu Sigma is justly proud of its achievements on this campus. The members have always endeavored to maintain the high scholastic standards set up by the men who have made up the Fraternity since its inception. We have been successful in maintaining those standards, and have won the Inter-Fraternity Scholastic plaque every term since our reorganization. In extra-curricular activities the Fraternity has always played an important part, always lending its support to any worthy movement.

The aim and purpose of Sigma Mu Sigma is to create a well balanced college life. It is the earnest desire of the Fraternity to turn out men capable of taking their place in the world with a well rounded education, men confident of their ability to meet and mingle with their fellow men.

House Mothers

A new innovation to the fraternity life on the campus has been the addition of a house mother for each fraternity. The activities of the house mother are to give the boys a more home-like environment, thereby increasing the morale and cooperation among their fellow members.

The Modulus Staff

Once again, our year book, *The Modulus,* cordially presents itself on the campus at Tri-State College, illustrating in an excellent manner student life and student activities. Beneath this blanket of illustrations, can be found the ideal of earnestly furthering the spirit of good-fellowship which is so evident on the campus today. Our most cherished memories in old age, are those of our college youth, and it is with this thought in mind that this edition of *The Modulus* is brought forth.

Spread throughout this issue of *The Modulus,* are featured columns written by *The Modulus* staff. These in addition to the articles compiled by the students present a larger and more varied collection than in former years. Charactristic in this issue are also old favorites and new specialties which brilliantly sparkle like bright stars.

The success of *The Modulus* was mainly attributed to the excellent cooperation among the members of the staff, the faculty advisor and the student body. With this same type of cooperation, the various departments constituting the Modulus staff, worked together as a unit and while doing so typified the American way of living and of doing things.

We therefore present this synopsis of student life in the form of *The Modulus,* and sincerely hope that you shall have as much pleasure reading it as we have had in composing it.

Alpha Beta Alpha

Alpha Beta Alpha, the Honorary Commercial Society, was founded in September, 1938, and was created to reorganize outstanding scholarship among the students in the School of Commerce.

To be eligible for election to Alpha Beta Alpha, a student must be registered in the School of Commerce and pursuing a course qualifying for the Bachelor of Science Degree. The student is required to maintain an average grade of "B" or better for the preceding four terms prior to his election. At the beginning of each term a list of eligible candidates is submitted to the society, and the four candidates with the highest scholastic standing are elected to membership.

Under the guidance of Professor H. R. Hoolihan and H. W. Hoolihan, the society encourages its members and all future members to maintain a high scholastic standing. Because of its limited membership this year, the social program was somewhat limited also, but the high ideals set by Alpha Beta Alpha have served as a good for all students in the School of Commerce.

The officers for this year were: Owen Mote, President; Ed Hathaway, Vice President; Miss Bodell, Treasurer.

Chi Epsilon

HONORARY CHEMICAL FRATERNITY

It is the desire of all prospective chemical engineers who enter Tri-State College to obtain membership in Chi Epsilon, the honorary chemical fraternity of Tri-State College.

The purpose of Chi Epsilon is to honor all students in the field of chemical engineering for their above average scholastic standing. It is an incentive to all chemical engineering students to do good work and to be sincere in the work they do. All prospective members of the fraternity must be active members in the chemical engineering society thus proving they have a deep interest in their field of study.

All new members upon entering the fraternity must give a short talk on some chemical subject with which they are familiar. This talk is given during the first meetings of the term in which he enters.

Through the fine supervision of Professor Gerald Moore, our honorary president, and honorary members, Professors Slanina, MacFerrin and Newnam, Chi Epsilon has become one of the outstanding groups on the campus. The interest shown by these men is greatly appreciated by all members of the fraternity.

Tau Sigma Eta

HONORARY ENGINEERING FRATERNITY

To a student and scholar nothing so exemplifies supreme satisfaction and triumph as recognition for efforts put forth in attaining scholastic achievement. Honorary Societies are the goal of every true student and realization of this goal means success of the highest order.

Tau Sigma Eta represents the ultimate of scholastic achievement on the campus of Tri-State College. It may be called the goal of every student. While many are not members of Tau Sigma Eta, it has surely been an incentive toward better and more conscientious study.

We of Tau Sigma Eta sincerely believe that we have reached our goal. Tau Sigma Eta was an incentive; now, it is an inspiration.

The Tau Sigma Eta Honorary Engineering Fraternity of Tri-State College was founded by the Engineering Society of Tri-State College in January, 1930. Articles of incorporation were drawn up in accordance with the laws of the State of Indiana in April of the same year, thus permitting Tau Sigma Eta to function as a collegiate Honorary Fraternity.

Entrance requirements for Tau Sigma Eta keep our ranks small. A student must have at least a "B" average for four terms to be eligible for admittance. Even this does not make him a member, for only seven are elected each term, the seven having the highest scholastic standing of the eligibles. Any student having an "A" average for at least three terms automatically becomes a member of Tau Sigma Eta. Extra curricular activities are nil as regards our entrance requirements.

Inter Fraternity Council

The Inter-Fraternity Council, as it is today, is the descendant of an organization known as the Pan-Hellenic Council. On December 8, 1935, the name was changed to the Inter-Fraternity Council. It is the object of this council to further the mutual interests of the member fraternities and to promote better and closer relationships between the faculty, student body, and fraternities.

The council consists of two representatives from each fraternity on the campus, meeting once each week to plan and direct activities that will benefit their chapters. These men act with the guidance and suggestions of their fraternities, still credit must go to them for their leadership and energy in supervising all affairs of the council.

It is only through the initiative of the council that we have the privilege of participating in the various sports, dances, and social activities that should constitute a part of college life.

The Inter-Fraternity Council has grown to be one of the most effective organizations on the campus, having won both the respect and admiration of the student body. The achievements of the council are due to the splendid cooperation which was shown the officers by each representative.

Front row: D. Bell, R. Cantwell, Prof. Steele, C. Adams, R. Salas, L. Jennings, C. Tobin.

Student Council

The Student Council as it exists in its present form, was founded by a group of students in the fall of 1940. Its main functions are to promote a closer relationship between all societies and fraternities on the campus, and to direct most of the student activities.

Last fall the Student Council again resumed its activities. The officers elected for this term were Charles Adams, president; William Brubaker, vice-president; Ray Cantwell, treasurer; and Harold Salas, secretary. Eighteen organizations on the campus are each represented by a senior and junior member on the Council. The vote is given to the senior member and in the case of his absence, the junior member has the vote.

The Student Council of 1942 has endeavored to increase as much as possible the activities on the campus. Every Tuesday afternoon they met as a body in a regular meeting to discuss and make plans for promoting the general welfare of the student. Although it has had very loyal support from the representatives, cooperation from the general student body was lacking. There is no reason why we on this campus should not enjoy most of the activities that exist in colleges throughout the country.

To increase the efficiency of the Student Council an amendment to the constitution was passed, giving the representative the power to vote as his judgment deemed fit, without previously consulting his organization. In this way much of the time lost in making a decision was eliminated. Undaunted in its efforts to reach its objective, the council has undertaken the study of ways in which to increase the activities. Plans are being studied by which it can sponsor dances, sports, and add such conveniences as a smoking room to the school.

But without your cooperation all these things will be nothing more than wistful dreams. To secure action, we need unity. Remember that it will not only mean more enjoyment for you, but it will help to put Tri-State on the map. Congratulations to all the representatives and officers of the Student Council of 1942. They have all done their best in trying to make this year the most successful in Tri-State history. It is our hope, that in the future the Student Council will be able to materialize our ideals.

B. Brubacher, *Vice President*
R. Cantwell, *Treasurer*
R. Salas, *Secretary*
C. Adams, *President*

Alpha Psi Omega

ZETA PSI CAST

Besides extra-curricular credit given to regularly enrolled students in dramatics, Zeta Psi chapter of the national honorary collegiate fraternity in dramatics offers contact with all two hundred and fifty chapters of the fraternity. Zeta Psi chapter does not confine its activities to the Tri-State campus alone, but is the nucleus of the community theatre and alumni players groups in Steuben county.

At the present time many of our members have been called into active military service, but these men are being sought out by a national committee, composed of Alpha Psi Omega men, and placed in entertainment or USO units as fast as there is the need for such service.

The fraternity unites with the Dramatic Club in giving a formal dinner dance at Potawatomi Inn in May. It is the big social event of the season, and is invitational.

W. Harrington, *President*
M. Caswell, *Secretary-Treasurer*

College Dramatic Club

The Tri-State College Dramatic Club is one of the oldest organizations on the campus and one of the most highly specialized groups. Beginning modestly in 1930, it has weathered almost unsurmountable obstacles and today boasts the largest membership in its history.

The Sniff Memorial outdoor stage on the campus was made possible principally by interested members of the Dramatic Club and Alumni. Elaborately staged Shakesperian comedies are presented each summer quarter, never failing to attract and please huge audiences. Special Easter and Christmas College Chapels include an appropriate one-act play by members of the club. The Dramatic Club bears the unique distinction among campus and off-campus collegiate organizations, of bringing to Tri-State the outstanding dramatic actress, Cornelia Otis Skinner, as the highlight of the club's tenth anniversary celebration. The club also adds a great part to the community festivities by presenting modern sketches and plays.

Under the skilled direction of Prof. Charles E. Shank, instructor of dramatics and speech, this organization has long ago proved its worth and right to exist at Tri-State. The active list of members is limited to twenty-five each quarter and membership is eagerly sought. Meetings are held regularly each Tuesday evening throughout the year and the club enjoys an enviable reputation thoughout the middle west.

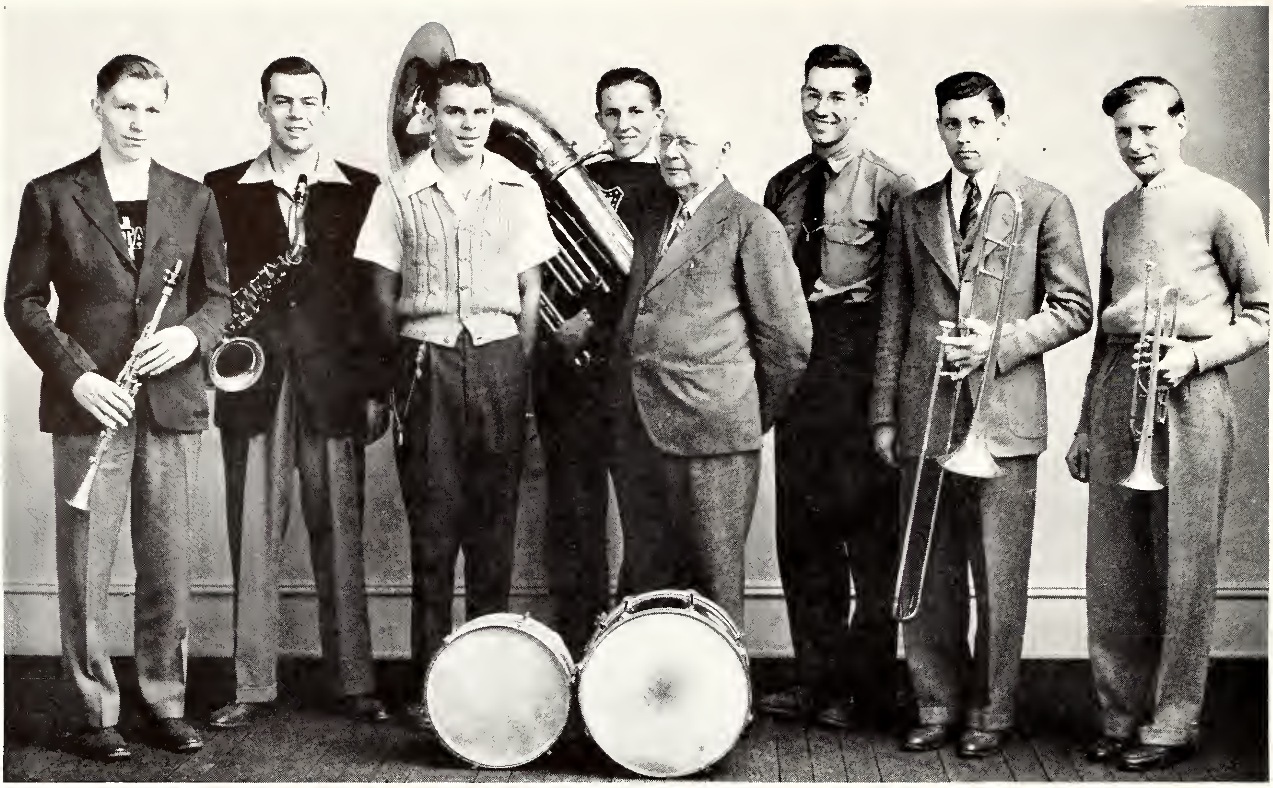
College Glee Club

The Tri-State Glee Club was organized in the fall of 1930 by the board of directors, and is still sponsored by that body. Membership in the club is open to all students who can qualify. The first year this number was small, numbering twelve or thirteen, but now the club boasts thirty-two active members.

The Glee Club is in constant demand for concerts in and around the school. During the year the club has made several trips to the high schools of the Tri-State area, including a trip to Hillsdale College. The club has also given several services at local and distant churches, as well as a concert for the local Lions Club. The club has enjoyed its most successful year since its founding and this success is due entirely to the untiring efforts of the members and directors. During the untimely sickness of Prof. Harshman the direction of the club was ably taken over by Dick White. Mr. White introduced several new songs and arrangements that proved to be a great success. The efforts of the club have not gone unrewarded because their fame has spread to some of the music publishers. The club was given several advance artist's copies, on which to pass judgment, by a popular American and British song writer, in return for this work a new school song has been offered to us.

Professor Harshman and Dick White, in directing this club, demonstrate not only their abilities as musicians, but also as organizers. We, of the student body,. thank Professor Harshman and the members of the club.



Left to right: B. Achor, R. Graham, K. Klopfenstein, M. Walck, Prof. Harshman, D. Weaver, B. Brubaker, M. Braid.

Tri-State College Band

Music plays an important part in everyone's life whether he is a musician or just a listener. People at parties dance to music; soldiers at war are marching to music. In these times of strife we are depending on music to relieve some of the strains that are being placed upon our people at home and abroad.

In December, 1938, a group of music lovers gathered to give the students of Tri-State College music for their activities. The constitution was drawn up, officers elected, music and instruments purchased and the band swung into full stride.

At the close of the third year of activity we find the band a progressing organization. Every basketball game was attended and a new form of music added to the affairs. Some "jive" in the form of "Tiger Rag" was given as the new rendition. This created quite a stir at the games. We must not forget the trip to Olivet, Mich. The band can both furnish music and become a good rooting section. To the bands of coming years we leave a challenge to keep up the progress of the past three years. There is great musical talent in this school, so go get it, fellows!

For five terms of playing in the band a student is presented with a letter from the college. These letters will bring great memories through coming years. We thank Professor Harshman for his constant interest through the year and leave with thoughts of many more musical years for him.

Athletics

Athletics not only give a man some means of recreation, but teaches him to relax, to co-operate, and to lead the rest of his group.

STATE
T

E. L. DRUCKAMILLER
Coach

Varsity Basketball

The team won eleven games and lost seven in one of the toughest schedules in the history of Tri-State basketball. They played such teams as Notre Dame, Toledo University and Central State Teachers. The team played one of its best games against Toledo University. The entire team showed great talent that evening, thereby being rewarded with a thrilling victory.

Graduation this year means the loss of some of our fine basketball players but with some of the veterans returning along with some excellent new players, the next season promises to be just as successful, if not more so, than this past season.

A trophy was awarded to the man considered by competent judges to be the most valuable man on the team. The factors considered in awarding this trophy were sportsmanship, scholarship, and the player's attitude while on the floor.

This year we wish to congratulate Al Schrieber for being chosen as the most valuable man on the team.

INTER-FRATERNITY FOOTBALL TROPHY
Sponsored by the Inter-Fraternity Council and awarded to the Beta Phi Theta Fraternity, champlons of the Inter-Fraternity Football League

Inter-Fraternity Football Champions

In the year of 1941 the first football competition among the fraternities was staged, sponsored by the Inter-Fraternity Council. Since then, all of the fraternities were eager to display their team in one of the most favored of all American sports, *football.*

Realizing that it has functioned only one year on this campus, it has grown into one of the best liked of sports.

The honor of being the 1941 champions was bestowed on the Beta Phi Theta Fraternity. They displayed a great spirit and won the competition in all fairness. During the last game, while battling the Alpha Gamma Omega, the Betas snapped one touchdown and thus enabled them the title of champions.

During the entire football season the weather handicapped the teams tremendously with mud. An unusual feature was that there was a three-way tie for second place.

Delving into the future the approaching year should contain many tough teams. Until that time the Greek letter men still can enjoy the other sports as baseball, bowling and swimming. Hence we say farewell to the departing squads, wishing them the very best of luck on the gridirons of their field.

INTER-FRATERNITY FOOTBALL RECORD

	Won	Lost	Tied
Beta Phi Theta	3	0	3
Alpha Gamma Omega	3	1	2
Alpha Kappa Pi	3	1	2
Phi Sigma Chi	2	0	4
Alpha Lambda Tau	1	2	3
Sigma Mu Sigma	1	5	0
Phi Iota Alpha	0	6	0

INTER-FRATERNITY BASKETBALL TROPHY

Sponsord by the Inter-Fraternity Council and awarded to the Alpha Gamma Omega Fraternity, champions of the Inter-Fraternity Basketball League

Inter-Fraternity Basketball Champions

Inter-Fraternity basketball competition has been popular on this campus for a number of years since the Inter-Fraternity Council has been molded to a more organized degree. It has been one of the oldest competitive sports displayed on the Tri-State campus and has been one that has been well liked.

On the basketball hardwood rectangle the bucket brigaders poured into the gym to witness the hard-fought fraternity's competition. As a rule, the games were staged previous to a varsity game and judging from the audiences' expressions the games were usually a formula for an exciting sixty minutes. The most outstanding factor was the game was usually a rough one, but always a clean-fought one. Alpha Gamma Omega Fraternity was credited for being the 1942 basketball champions after staging a brilliant season by capturing the entirety of the six games played, scoring 156 points. This is the second consecutive year the red and white men were victors thus enabling them to rightfully earn the trophy.

Ending this brief resume of the 1942 season, congratulations should be given to the Greek letter teams that displayed a fine spirit and showed what they were made of. We say goodbye and good luck to them until the beat of the hardwoods rings again.

INTER-FRATERNITY BASKETBALL RECORD

	Won	Lost
Alpha Gamma Omega	6	0
Beta Phi Theta	2	2
Phi Iota Alpha	2	2
Alpha Lambda Tau	2	3
Sigma Mu Sigma	1	3
Alpha Kappa Pi	1	3
Phi Sigma Chi	0	4

INTER-FRATERNITY BOWLING TROPHY
Sponsored by the Inter-Fraternity Council and awarded to the Alpha Gamma Omega Fraternity, champions of the Inter-Fraternity Bowling League

Inter-Fraternity Bowling

Bowling was the most popular sport among the fraternities this year. The competing teams bowled the most games ever scheduled, therefore the games were divided into two halves, where the winner of the first half was to play the winner of the second half in order to determine the sole possessor of the championship trophy. The first half ended up in a tie between the Alpha Gamma Omega and the Beta Phi Theta Fraternities, therefore an additional three games had to be played for the championship of the first half. After losing the first game the Alpha Gamma Omegas became the victors by defeating the Betas the next two successive games. Some of the highest games of the season were bowled that evening by both teams. Although competition was keen throughout the second half, the Alpha Gamma Omegas won again, making them the undisputed champions for the season. All the teams of the various fraternities showed great sportsmanship and co-operation, and every game was hard-fought until the last ball was thrown down the alley.

A great deal of credit must be given to a group of young men who have never picked up a bowling ball until this season and after a slow start they really were a threat to every team in the league.

The members of the championship team were: Bob Jennings, Ralph Casbarro, Capt. Walt Jasinski, Chet Weslowski and Don Paffumi.

INTER-FRATERNITY BOWLING RECORD

	Won	Lost
Alpha Gamma Omega	50	10
Beta Phi Theta	37	23
Alpha Lambda Tau	31	29
Sigma Mu Sigma	30	30
Phi Iota Alpha	25	35
Phi Sigma Chi	22	38
Alpha Kappa Pi	20	40

This year the *Modulus* wishes to present a new feature in the form of a section devoted to the girls who were chosen by the various fraternities on the campus to reign as their sweethearts for the year.

It is with this thought in mind, we present to you

Office view of new addition to the Frederick Post Co. plant

That others may produce . . On Schedule

Defense begins on the drafting engineer's table. Before a plant can be built, he must plan it. Before a tank can be manned, he must see every tread and trigger on paper. He works *first*—quickly, so that others may produce On Schedule.

Strictly on schedule under heavier and heavier demands are four important POST developments created to help speed up the output of the busy designer and drafting engineer. These four—*P.T.M., Pencil-tex, Master-repro* and *Vapo-paper*—are particularly suited to the Quality plus Speed requirements of today. Have you asked for samples for testing? Ask your nearest POST dealer or write to The Frederick Post Company, Box 803, Chicago.

THE FREDERICK POST CO.

INSTRUMENTS • EQUIPMENT • BLUE PRINT PAPER • KINDRED SENSITIZED PRODUCTS

P.T.M. — MAXIMUM TRANSPARENCY PENCIL MEDIA
PENCIL-tex — PENCIL CLOTH ★ INK-LIKE RESULTS
